

## Features

- Precise conveyance to the cutter without scattering materials.
- By moving the slide air table to the center of the cutter, easy loading of materials to the cutter is available.
- Easy rotation with simple operation.
- High work efficiency as you can place materials on the jogger or slide air table and wait, and after cutting is finished, you can promptly set next materials on the cutter.
- This system also can be used as a air table in case of cutting small paper.
- This system can be easily fitted in any cutter of any maker.
- Following the instructions, this system can be fitted on the left or on the right side of a cutter using a spanner only.
